HOW TO USE THESE REPLACEMENT PART LISTINGS

1. These Replacement Parts Lists apply to the receivers in Radio Volume 23 only. It is possible that receiver manufacturer's parts numbers shown in Rider Radio Manual 23 appear in earlier manuals, in which event the replacement parts shown in manual 23 are applicable.

2. The column headed "Receiver Manufacturer" lists the component followed by the receiver manufacturer's part number. The Dependable Replacement Part is listed by part number on the same line under the replacement parts manufacturer name headings. For example, the replacement for the Admiral variable resistance part #75B1-25 is: a Clarostat AG-63-Z with KSS-3 shaft, an IRC replacement Q13-137, or the Mallory replacement U-53.

3. In many cases the Audio Output Transformer numbers listed are the same as Speaker numbers. This is because they are listed as Speaker-Transformer combinations. In these cases, no separate part numbers exist for the Output Transformers. Hence the Speaker numbers are listed under AF Output Transformers.

4. Electrical constants shown in the "Remarks" column apply to the original component. Information following dagger notation symbols such as †, ††, ‡, etc., apply to the replacement part. Asterisk notation marks are explained at the bottom of the replacement parts list.
